Projects

Aroma of Poetry - Website Development Project

- **Technologies:** Developed using HTML, CSS & JavaScript for the front-end.
- **Features:** Aroma of Poetry is a user-friendly platform where poetry enthusiasts can share and read creative works. The website allows for seamless poem submissions and exploration of published poetry.

Campus Cart Deals – Web Application Development Project

- **Technologies:** We utilized the MERN stack for application development, incorporating diverse APIs. Future aim is to integrate an AI-driven chatbot for enhanced user interaction.
- **Features:** Campus Cart Deals is a dynamic web-based application offering users a variety of categorized products to buy and sell within the university campus.

Expense Tracker App- Mobile Application Development Project

- **Technologies:** Utilized Flutter and Dart for cross-platform mobile development. Also used Android Studio for efficient app development.
- **Features:** Expense Tracker is a user-friendly mobile application designed to help users manage their expenses efficiently. Developed using Flutter and Dart, the app offers a seamless experience for tracking and categorizing expenses on-the-go.
